

# Sora

Where students read

## Help students read more with Sora!

New Reading Goals help readers soar further than ever before.

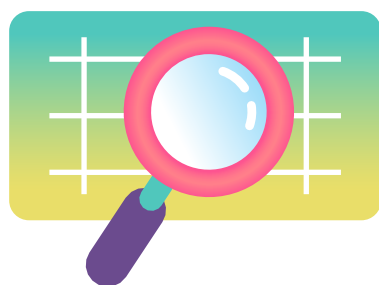

### RECOMMEND READING GOALS

Sora's 20-minute goal default is based in reading research, but students can set goals between 5-60 minutes. Help students select a reading goal that's the right "size" for them.

### MONITOR PROGRESS

Review and discuss reading goals and habits when meeting with students individually. Track progress, suggest changes, discuss what they've read, and set challenges.

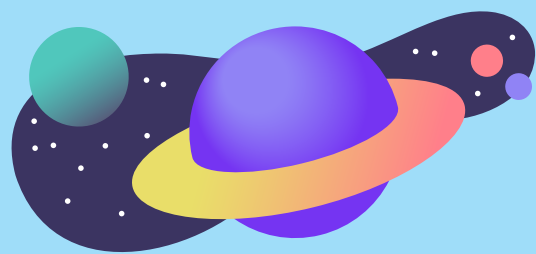

### MAKE DATA-DRIVEN DECISIONS

View real-time student reading data, including goals, total reading time, milestones, achievements, and more in Marketplace's student dashboard.

### UNLOCK NEW WORLDS

Motivate students to keep reading with a classroom milestone chart. See how many milestones you can reach together as a class.

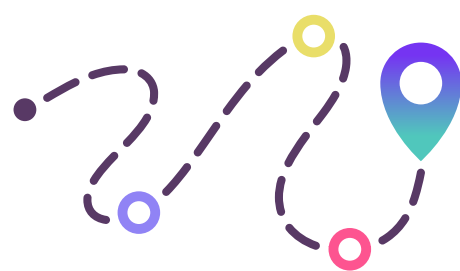

### REINFORCE GOOD HABITS

Sora opts to build good reading habits through positive reinforcement. Students are rewarded for cumulative effort rather than pressured by streaks.

### MAXIMIZE DIGITAL'S BENEFITS

Sora provides tools and insights that print materials simply can't. Instantaneous definitions, exportable annotations, and engaging content complement built-in reading goals.

### GUIDE STUDENT LEARNING

Encourage learning by putting the right content in front of your readers with Title Assignments, class sets, curation, and content bundles.

### CELEBRATE READING

Sora celebrates student reading progress. Find ways to recognize accomplishments, whether individually, with parents, or through classroom displays of completed books.
