#### **RUNNING THE HOLDS REPORT**

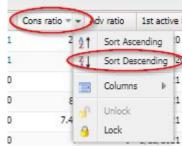

#### **Getting started:**

- 1. Log into Marketplace and click the **INSIGHTS** tab on the blue bar across the top of your screen.
- 2. Click Current holds (under Popular Reports on the left-hand side of the screen).
- 3. Click the **Run new report** button.
- 4. Set your report **options**:
  - o Run by: Title
  - o Branch: Select your individual branch if you're an Advantage library or if you are purchasing based on your branch. Otherwise, leave blank
  - o Availability: Available for sale
- 5. Click Update.

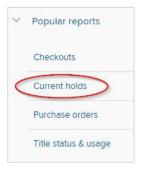

# Viewing search results:

1. Locate the **Cons ratio\*** column and hover your mouse over the column header; an arrow will appear to the right of the header name. \*"Cons" stands for "consortium," and refers to your shared library collection.

Note: When you run a holds report by branch, the "total holds" column will always match the "ADV holds" column. There are most likely more total holds on the title than appears in these report results.

2. Click the arrow in the Cons ratio header and choose **Sort descending**. This option reorganizes results so the books with the most holds per copy owned are listed first.

~

~

#### TIP:

Ideally the ratio of holds to copies owned is no more than 5-10.

We will create a cart of titles with a ratio of 3 more. Note how many titles in the report have a Cons ratio of 3 or higher.

There are 10 in the following example:

#### Creating a cart from the Current holds report:

- 1. From the Current holds search results, click Convert to new cart.
- 2. In the pop-up window:
  - Name your cart.
  - Add a description (optional).
  - Add the number of titles with a Cons ratio of 3 or more.
  - Select Cons ratio for the Include titles based on field.
  - Ensure Pin as main cart is checked.
  - Click CREATE to generate holds cart.

3. Click the orange **CARTS** button in the upper right-hand corner of Marketplace.

### Locating and reviewing your holds cart:

- 1. On the **CARTS** page, locate the holds cart you created.
- Open the holds cart.
  There will be one copy of each title from your holds report with a Cons ratio of three or more.
- 3. Review the titles in the hold cart.

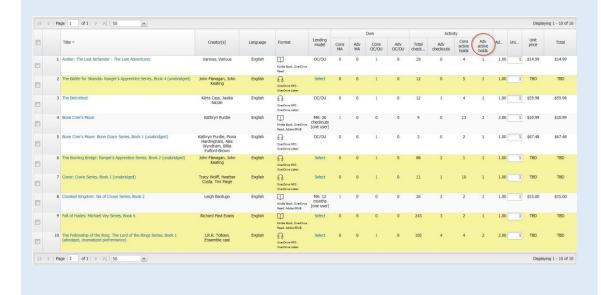

#### TIP:

Pay close attention to the **Adv active holds** column.

This is the **total number of current active holds** from users at <u>your</u> library.

If you see a **high number of holds** from your users, you may want to increase the number of copies you're purchasing.

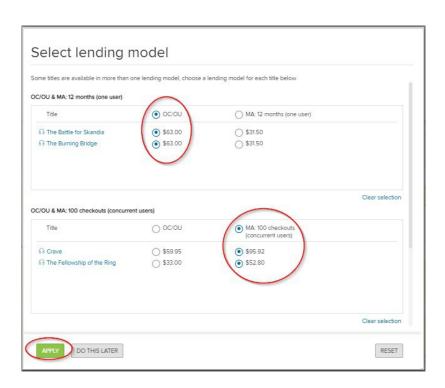

In the example below, there are **not** more than **2 Adv active holds** for any title, so we'll only purchase **1** copy of each book for now.

#### Selecting a lending model (where needed):

If any titles are highlighted in yellow (see above screenshot for an example), you'll need to choose a lending model for that title before purchasing.

- 1. Locate the **Lending model** column.
- 2. Click **Select** where it appears in that column for each highlighted title.
- 3. Select the **desired lending model** for that title in the pop-up window.
- 4. Click **APPLY** to confirm the chosen lending model.

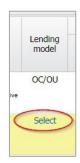

## **Purchasing your cart:**

1. Click the green **PURCHASE CART** button (or click **CREATE QUOTE** to generate a quote if needed to secure a Purchase Order).

Complete your purchase by agreeing to the special conditions and selecting your payment method.

# PURCHASING HOLDS ADDITIONAL TRAINING (OPTIONAL)

Looking for more in-depth training on getting your holds current or managing holds in Marketplace?
